Quarter 1 – Module 5 Community Health Resources and Facilities

Introductory Message

This Self-Learning Module (SLM) is prepared so that you, our dear learners, can continue your studies and learn while at home. Activities, questions, directions, exercises, and discussions are carefully stated for you to understand each lesson.

Each SLM is composed of different parts. Each part shall guide you step-bystep as you discover and understand the lesson prepared for you.

Pre-tests are provided to measure your prior knowledge on lessons in each SLM. This will tell you if you need to proceed on completing this module or if you need to ask your facilitator or your teacher's assistance for better understanding of the lesson. At the end of each module, you need to answer the post-test to selfcheck your learning. Answer keys are provided for each activity and test. We trust that you will be honest in using these.

In addition to the material in the main text, Notes to the Teacher are also provided to our facilitators and parents for strategies and reminders on how they can best help you on your home-based learning.

Please use this module with care. Do not put unnecessary marks on any part of this SLM. Use a separate sheet of paper in answering the exercises and tests. And read the instructions carefully before performing each task.

If you have any questions in using this SLM or any difficulty in answering the tasks in this module, do not hesitate to consult your teacher or facilitator.

Thank you.

What I Need to Know

This module was designed and written with you in mind. It is here to help you identify the different health resources and facilities in the community. The module consists of only one lesson.

Lesson 1 – Different Health Resources and Facilities in the Community and Their Importance

After going through this module, you are expected to:

- identify the community health resources and facilities that may be utilized to address a variety of personal health issues and concerns **(MELC, H6PH-Igh-23)** and
- discuss the importance of community health resources and facilities.

What I Know

- Directions: Read the statements below. Tell the community health resources or facilities being referred to. Choose the letter of the correct answer from the given words inside the box. Write the answer in your notebook.
 - 1. It is a facility that offers dental or oral care.
 - 2. This is a specialist for muscular disorders who give hands-on care and prescribed exercises to persons with injuries, disabilities and other health conditions.
 - 3. Services like treatment, consultation, vaccination and surgery are being offered in this facility.
 - 4. This facility provides medical care to children, teachers and other school personnel.
 - 5. This person is a specialist in heart problems and diseases.
 - 6. This is a community health resource that assists doctors in giving health care to patients.
 - 7. This specialist offers eye care to persons with eye problems.
 - 8. Over-the-counter and Prescription medicines that help in the wellness of people are being sold in this community facility.
 - 9. It is a facility that offers health services to people living in barangays or barrios.
 - 10. This is a community health resources that performs operations and surgical related cases.

- A. CardiologistB. Nurse
- C. Drugstore
- D. Dental Clinic
- E. Physical
- Therapist
- F. Hospital
- G. Surgeon
- H. School clinic
- I. Ophthalmologist
- J. Barangay Health Center

LessonDifferent Health1Resources and Facilities1in the Community andtheir Importance

Community health resources and facilities play a very important role in offering health services to people. We need to know the available health resources and facilities in the community to be utilized in addressing a variety of personal health issues and concerns.

What's In

Community health resources include our nurses, doctors, dentists, midwives and other health workers that offer health care or services. They perform their roles or responsibilities in different facilities. Facilities like clinics, health centers and hospitals offer amenities or services to address or help people with their personal health problems. They are treated, given appropriate medications, and thorough attention on their health needs. Different resources and facilities in the community can help save and preserve people's lives.

What's New

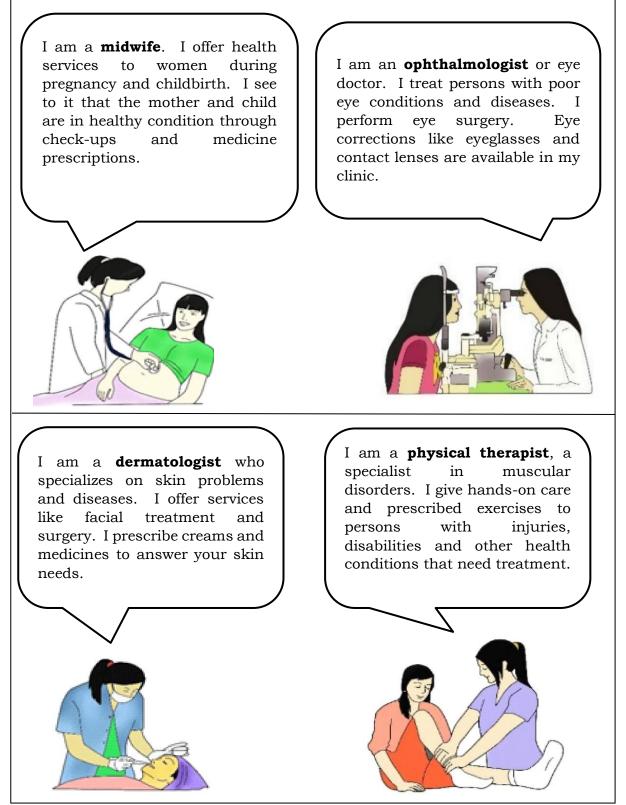

Directions: The community human resources are here today to tell you the roles or responsibilities that they perform each day. They will let you know their importance as health care providers. Read the comic strip and take note of what they are saying.

I am a **dentist**. I give dental care by checking the over-all status of the teeth and gums in the mouth. I do tooth extraction, cleaning, surgery and alignment like putting braces or retainers.

I am a **doctor**. I do physical and medical examination to diagnose or know your diseases or ailments. I give advice on your health needs.

I am a **nurse**. I assist the doctor in giving health care. I check your vital signs like blood pressure and pulse rate. I give medicines to be taken in and shots or injections to make you well. I am a **pediatrician**. I am a specialist in children's health and diseases. I give vaccines to boost their immune system. I monitor their growth and I also prescribe medicines if they are ill or not feeling well.

Illustrated by Zoila Mae M. Panes, Riza E. Celebrado, and Marvin P. Pagurayan

A. Directions: Here are the community resources and facilities that provide amenities and services to address the personal health issues and concerns of people. Let's learn the importance of each one.

This is a facility for consultation, treatment, surgery and hospitalization needs of patients. Different doctors or specialists are working here to serve your health needs.

It is a station that gives emergency care or treatment before medical aid can be given. First aid supplies are kept here. Health volunteers, first aid helpers and providers are here to respond to your needs.

Nutrition Health Center

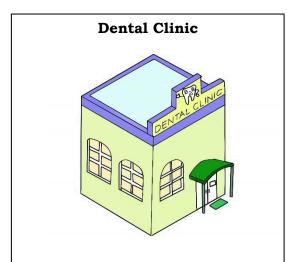

It is a facility that roll-outs programs like advocacy on good nutrition, feeding program and giving of free vitamins and minerals for good nutrition. Nutritionists and other health workers offer services here.

Medicines are sold in this store or facility. Pharmacists work here to sell medicines and help patients on the use of prescribed and over-thecounter drugs.

Illustrated by Zoila Mae M. Panes, Riza E. Celebrado, and Marvin P. Pagurayan

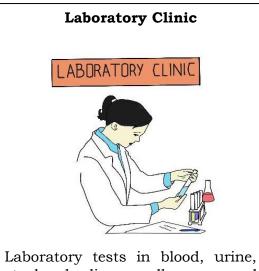

Oral or dental care is being offered in this facility. Dentists are working here to treat gums and teeth problems.

This facility provides care to women's health during pregnancy, childbirth and postpartum (after birth). Midwives and other health care workers offer services to make sure that the mother and her baby is in good condition.

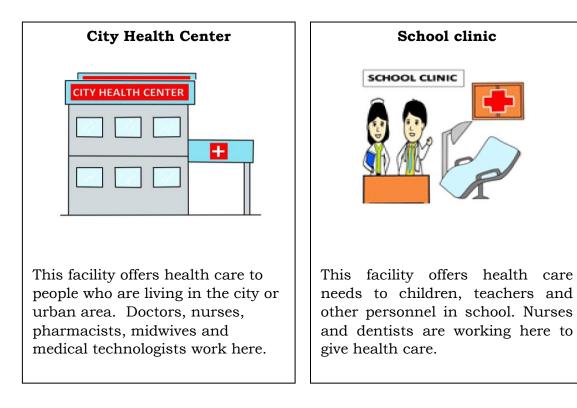

Laboratory tests in blood, urine, stool and saliva as well as x-ray and ultrasound are offered here. Medical technologists, other health care professionals and technicians work here.

Barangay Health Center/Station

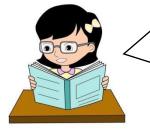

Health assessment for the people in barangays or rural areas are being offered in this facility. Barangay health workers (BHW) and health volunteers work in this facility.
